ABOUT ME

12 years coding, 7 years in product, and 5 years teaching. I grow projects and teams from scratch to high performance.

I started coding when I was 12 years old, and founded my first startup in my early 20s. Later, I discovered that technology means nothing if nobody uses (and loves) it. So I moved my focus to product. Then, I started teaching each step of the way.

I'm looking for interesting products in challenging sectors.

JOB EXPERIENCE

TPM & FULLSTACK DEVELOPER

Google for Startups (Contractor) | 2019 - 2022
